## Grade 3 Library Class Creates Online Presentations About the Planets!

In February & March, Mrs. Bellen's 3rd-grade library class used recently conducted classroom research on planets in our solar system to create online presentations. They used non-fiction books and the online database "PebbleGo Earth & Space" to conduct their classroom research then created their online presentations using Microsoft Sway. You can view their excellent work by following the link on the library webpage, the library's Facebook page, or Mrs. Bellen's classroom website...

2nd grade students participating in a library reading group recently created online Popplet presentations based on their reading of the novel "Sarah, Plain & Tall," available on the library webpage. And K-1 classes recently enjoyed the wildly imaginative books of March Author of the Month Dr. Seuss - ask your child if Yertle the Turtle was a kind king? That's the Buzz!

## BOOKS & PIE = PERFECT MATCH!

Enthusiastic Valleyview 5th graders have begun participating in the library's "Newbery Pie Club," during lunch/recess every other Day 5 in our school schedule. Students are encouraged to read a Newbery Award winning chapter book, awarded as such by the American Library Association, then they share the book and review it to the group while eating lunch and Mr. Parmerter's selection of homemade pies!

## 5th Grade Library Classes Learning About Internet Safety!

Grade 5 library classes have begun an Internet Safety unit which, when complete, will provide each student with a 'Digital Passport,' or certificate showing that each student has a basic understanding of how to protect themselves while online and the importance of being kind while online. This learning can be effectively reinforced if parents & children at home also have these discussions!
