## "Muffins with Moms" & "Donuts with Dads" for Kindergarteners in the library!

On the morning of Thursday, May 11th, Kindergarten students and their moms enjoyed "Muffins with Moms," an hour in the library enjoying breakfast and books together! Kids and their moms ate, drank, and read books together, while moms also had an opportunity to get a tour of the library from their Kindergartener and to meet Mr. Parmerter. Then on Friday, June 2nd, dads had their turn by enjoying "Donuts with Dads" with their Kindergarteners. A fun time was had by all, thanks to those who came!

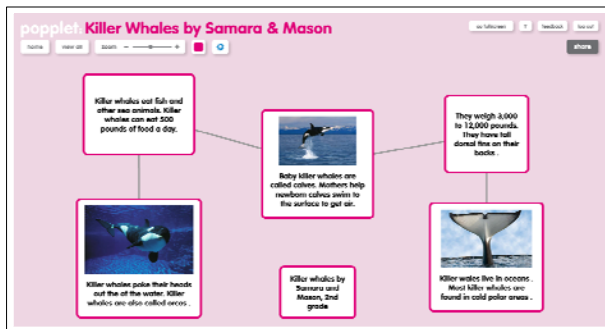

Parents looking for recommended Summer reading lists for their kids will find this link to be a terrific resource: [www.haisln.org/reading-lists.html](http://www.haisln.org/reading-lists.html).

5th grade library classes have completed a Digital Citizenship unit and students have earned Digital Passports showing they have learned how to make safe choices on the Internet. Mr. Dutcher's 4th grade class was the first to return all their books and will enjoy a library pizza party! That's the Buzz!

### Grade 2 Classes Research Mammals!

Both 2nd grade library classes recently researched mammals using the online PebbleGo animals database. Using their research, partners in both classes then created online presentations using popplet.com. This activity was their first big research project in library class, and they did a terrific job of working with their partners, taking notes on a graphic organizer, creating their presentations, and working with Mr. Parmerter to edit their final work. To view their work follow the link on the library webpage, or the link provided on the library's Facebook page.

### 4th Grade Completes Projects!

4th grade library classes spent May using their online encyclopedia researching skills to study topics of their choice which each student then turned into online presentations using Google Slides! To see their fine work, follow the link on the library webpage or follow the link on the library's Facebook page.
